One Final Note...

It is against the law to ride a bicycle under the influence of alcohol and/or drugs. (21200.0 VC)
COMMON CAUSES OF BICYCLE ACCIDENTS

- Bicycle rider using the wrong side of the road.
- Auto driver making unsafe left or right turn.
- Bicyclist riding from driveway or sidewalk into path of car.
- Auto driver opening door as bicycle passes.
- Bicycle rider weaving, leaving edge of road or bike lane.
- Bicyclist making unsafe left turn.
- Bicycle without headlight or reflectors.

WHY SHOULD I REGISTER MY BICYCLE?

- A license sticker in plain view might discourage a thief.
- If your bike is stolen your chances of getting it back are better if it is registered.

WHAT ABOUT LOCAL LAWS?

Some cities and counties prohibit riding bicycles on sidewalks. Other local laws deal with parking of bikes and use of pedestrian or special bicycle facilities. Check with your local government to learn about these laws.

This pamphlet gives you important information about bicycle safety. Knowing what to do on your bike can save you money, save you from injury, and even save your life. A good understanding of bicycle safety lets you ride with greater confidence and enjoyment.

WHAT ARE THE LAWS?

Bicycle riders and automobile drivers follow the same rules and have the same rights. Example: Cars must stop at a stop sign and bicycles must stop at a stop sign. Always ride with traffic. Bicyclists must travel in the same direction as cars.

1. When moving slower than the normal traffic speed, stay near the right edge of the road, except:
   a. When passing another bicycle or vehicle.
   b. When getting ready to turn left.
   c. When passing a parked car or to avoid other objects.
   d. When on a one-way road, two lanes or wider. Bicyclists may ride near either the left or right side.
MAINTENANCE

Bicycles require routine maintenance to assure proper operation.

Things you can check while riding:

- Listen for sounds of rubbing, squeaks and rattles and immediately investigate their source.
- Slipping (free wheeling) or difficulty changing gears may mean that the gear cable tension is too loose or too tight (multi-speed bikes).
- Loose tension on the drive chain.
- Brake effectiveness.

Things you can do yourself:

- Use a tire gauge to check tires every few days. Proper pressure is indicated on the tire sidewall or in your bicycle manual. Check tires for cracks, cuts or bulges. Remove imbedded stones, nails, glass, etc.
- Adjust seat and handlebars to fit.
- Lightly oil and clean moving parts. Keep oil off rubber. Wipe off excess oil.
- Tighten and/or adjust loose parts.
- Make sure handle grips are glued or tightly secured to handlebars.
- When possible, store your bike indoors; moisture will cause rust.
- Keep your bicycle clean by wiping dust away with a soft cloth. Wipe it dry when it gets wet.

Bicycle shops can supply the parts you need to maintain your bicycle.

Whenever there is a bike lane, a bicyclist must use it when moving slower than normal traffic speed. Leave the lane only:

a. When necessary to pass another bicycle, vehicle, or pedestrian.
b. When getting ready to turn left.
c. When necessary to avoid parked cars or other objects.

Keep at least one hand on the handlebars. Bicyclists must ride on a permanently attached seat. Carry no passengers unless there is a separate seat.

A passenger must ride on a separate seat – never on handlebars. A youngster four years or younger, or weighing 40 pounds or less, must ride on a seat which holds the child in place and protects the youngster from moving parts. The child must also wear an approved helmet.
THEFT PRECAUTIONS

- Always lock your bike when leaving it.
- Use a strong chain and padlock, or other suitable locking device.
- Secure the frame of the bike to something solid (bike rack, tree, etc.).
- Write down the license number, frame serial number, and model type of the bike. Keep the note in a safe place. If the bike is stolen, this information will identify it.
- Park your bike where it can be easily seen.

DO I HAVE TO REGISTER MY BICYCLE?

You must register your bike if your community requires it. Many cities and counties do. Usually, you can register at your local fire or police station. Call your city hall or county office to be sure.

4. Give proper hand signals when turning or stopping. Correct signals are:
   a. LEFT turn – Left arm straight out pointing left.
   b. RIGHT turn – Left arm pointed straight up, or right arm straight out pointing right.
   c. STOP – Left arm pointed straight down.

5. Before leaving a lane, give a hand signal. Leave the lane only when safe to do so.

6. Never hitch rides by hanging onto or attaching your bicycle to a moving vehicle.

7. Bicyclists may not ride on most freeways. Signs at freeway ramps tell when bicyclists must not enter.

8. Never leave your bicycle blocking a sidewalk.

9. Bicycles must be correctly equipped. (See equipment section.)

10. Headphones covering both ears may not be worn while operating a bicycle.
WHAT ARE THE EQUIPMENT REQUIREMENTS?

- **Helmet**
  A person under 18 years of age cannot operate a bicycle or ride as a passenger without a properly fitted and fastened bicycle helmet that meets the standards of the American National Standards Institute (ANSI) or the SNELL Standards for Protective Headgear.

- **Handlebar**
  Must be set so that your hands are no higher than your shoulders when you hold the regular steering grip area.

- **Bicycle Size**
  Operator must be able to safely stop bicycle upright with at least one foot on the ground.

- **Brakes**
  Must be able to make a one wheel skid on clean, level, dry pavement.

---

**Night Riding**
Bicycles must be equipped with the following:

**Lights:**
A white head lamp, attached to the bicycle or rider's body, visible from 300 feet to the front and from the sides.

**Reflectors:**
- **a. Red** rear reflector.
- **b. White or yellow** reflectors on front and back of each pedal.
- **c. White or yellow** reflectors on each side forward of center of bike.

---

**SAFETY TIPS**

- Cross sewer gratings and railroad tracks at a 90 degree angle.
- Stay in single file when riding with others.
- Cross busy intersections by walking your bicycle.
- Wear shoes – avoid getting toes caught in moving parts.
- Avoid long skirts and flare pants. Clasp pants to legs with clips or leg bands.
- Clip or band hair to keep it from blocking vision. Avoid scarves which can flap over eyes.
- Wear proper safety equipment at all times; i.e., bright clothing, approved bicycle helmet, safety goggles.
