FROM THE CALIFORNIA HIGHWAY PATROL.

REVISED JANUARY 2014

LIBRARY DISTRIBUTION ACT

FOREWORD

The CHP has built an award-winning computing infrastructure of networks that facilitate communication and office automation. California Highway Patrol employees rely on the information, automation tools, and capabilities the CHP networks provide to support law enforcement and related administrative functions.

Under the direction of Information Management Division (IMD), the Department's Network Administrators, Network Coordinators, and other technical staff support the CHP infrastructure of statewide networks. These employees ensure the networks are running safely and efficiently. This manual is a resource for these employees and other system users. It defines roles and responsibilities, and the policies and practices that apply to the use of CHP networks. Any questions about this manual should be directed to IMD and/or the appropriate section commander.
