FOREWORD

The purpose of this manual is to provide policy and direction concerning the administration and maintenance of the Department's communications systems.

The primary objective of this manual is to enable all levels of departmental management and supervision to administer these communications systems in a timely and effective manner based on system standards and operational requirements. In addition, this manual will assist all levels in knowing what is standard, how to ensure the systems are maintained expeditiously, and lead times required to provide communications capabilities.

Information contained in this manual is primarily for the administration of the Department's communications systems. Operational specifications and instructions for systems and components are contained in Highway Patrol Manual 60.1, Communications Operations Manual.
