

# Statewide Reference Tables Overview

**BCIA Mission:** To support criminal justice and regulatory agencies by maintaining, analyzing, and providing access to California's criminal offender record information and crime data through continued technological innovation and collaborative partnerships; powered by dedicated staff committed to delivering timely and efficient results.

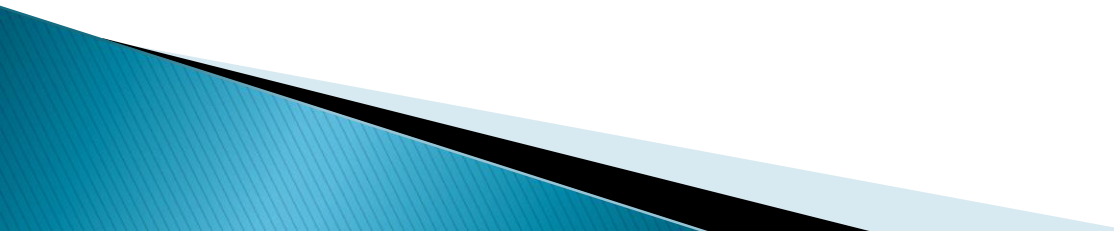

Marc St.Pierre, Assistant Director  
Bureau of Criminal Information and Analysis

# Problem

- ▶ CA DOJ publishes statewide reference tables; however not all criminal justice and regulatory agencies use these tables or they use outdated versions
  - ▶ Maintenance of these tables is an unfunded mandate; subject to resource availability and workload prioritization which to lack of standardization and normalization of data
  - ▶ Agencies have attempted to maintain their own tables and map to the CA DOJ statewide reference tables as best as they can
  - ▶ Federal agencies find it difficult to map their data to California data
  - ▶ Researchers and Statisticians find it difficult to use California data to inform the public and policy decisions
- 

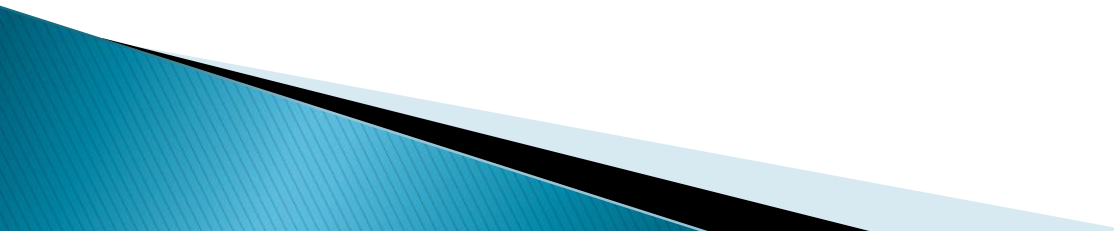

# Opportunity

- ▶ CA DOJ is uniquely positioned to maintain statewide reference tables used by criminal justice and regulatory agencies
  - ▶ There is a growing recognition throughout the criminal justice community that standardized and normalized data delivered by the CA DOJ statewide reference tables is critical to success
  - ▶ Law Enforcement Agencies, District Attorneys, Courts, and Probations are all actively supporting CA DOJ efforts to standardize and normalize statewide reference tables
  - ▶ CA DOJ has partnered with criminal justice associations to establish a working group to review and update the Offense statewide reference table
  - ▶ CA DOJ is looking to secure funding to support the on-going maintenance of statewide reference tables and data governance
  - ▶ CA DOJ continues to perform outreach regarding existing statewide reference tables and the efforts to improve those services
- 

# Offense Statewide Reference Table

- ▶ CA DOJ, and the working group, will complete a first review of the existing Offense statewide reference table by August, 2019
- ▶ CA DOJ is working to publish an updated Offense statewide reference table that incorporates the feedback and contributions of the working group
- ▶ In addition to “record-level” updates to offenses on the Offense statewide reference table, the CA DOJ is working to incorporate additional data elements that further enhance data about an Offense; including things like:
  - Unique Identifier \*
  - Statute \*
  - Description \*
  - Level of Offense \*
  - Serious/Violent
  - Repeal Date
  - Enactment Date
  - NCIC Codes
  - JBSIS Code
  - Sex Offender Registration Required
  - Firearms Prohibition Required
- The objective is to create statewide reference tables that can uniformly and consistently be used by local, state, and federal agencies; with a high-level of confidence that everyone’s data “means” the same thing

# Key Benefits

- ▶ Common terminology, less ambiguity
  - ▶ Data-driven decision making capabilities
  - ▶ Improved research and statistical reporting
  - ▶ Less resource intensive to maintain statewide reference tables and implement changes
  - ▶ Timely distribution of updates
-
